Footnotes:
1: OCS is the U.S. Outer Continental Shelf.
2: This list is by corporate name and each company in the list includes revenues from all affiliates.
3: The amounts are based on total offshore collections by accounting year for Calendar Year 2017.
4: Reported Royalties are based on a percentage of the revenue from the commodity sold. The exact percentage is set in the original lease document that went along with the lease sale.
5: Bonuses are defined as sealed bonus bids used for competitive lease sales, with leases awarded to the highest bidder. Successful bidders make an up-front cash payment, called a bonus bid, to secure the lease.
6: Rents are defined as payments due on or before the first day of each lease year before the discovery of oil or gas on the lease.
7: Inspection fees are fees paid by operators for rig, annual production and other inspections.
8: Other Revenues are comprised of several sources such as, but not limited to: settlements, fees, taxes and interest paid by operators.
9: Total Top 20 "Other Revenues" is higher than the total all OCS contributors "Other Revenues" due to operators reporting negative "Other Revenues" as defined in Footnote 8 above.
Note: Number in parenthesis () denotes the ranking of the operator in the specific category heading.
