

1st Annual BSEE Domestic and International
Standards Workshop
New Orleans 14–15 November 2012

Doug Morris
Chief, Office of Offshore Regulatory Programs

GOALS OF THE WORKSHOP

1st BSEE Domestic and International Standards Workshop

Goals:

- To discuss BSEE's role in national and international standards development .
- To look for opportunities to increase the coordination and efficiencies in the development of offshore standards.
- Discuss the status of standards that impact OCS activities.

Importance to BSEE

- DOI has a long history of incorporating industry standards into its' regulatory program.
- In some instances they enable us to avoid redundant detailed regulations.
- In some instances, industry standards are developed faster than new regulatory requirement are promulgated.
- Standards help to set the industry baseline for technical and safety issues.
- The complexity of new technologies has increased the importance of standards development to regulators.

What the Workshop Does

- Provides a central meeting ground to bring together professionals involved in developing domestic and international standards and those who implement the standards.
- Provides the opportunity for an informal exchange of ideas.
- Increases the understanding of the standards development process.
- Creates a better understanding of roles and expectations of various stakeholders.
- Provides an update on current and future standards activities.
- Provides an opportunity to identify gaps in standards or regulations.

WE HOPE THIS WORKSHOP IS USEFUL TO YOU!

Safety at all levels, at all times!
