

Arctic Specific Standards

Collaborative Work Efforts

➤ Arctic Council Working Groups

- Draft project proposals calling for collaborative review of Arctic specific standards and opportunities for further development

➤ Barents 2020 Project

- Norway/Russia collaborative project intended to harmonize and agree on standards for oil/gas operations in the Barents Sea
- DNV facilitated effort with plans to disseminate lessons learned through series of knowledge sharing workshops

➤ International Association of Oil & Gas Producers (OGP) *Regulators' Use of Standards (March 2010 Report)*

- Report reflects national regulators' reference and use of national, regional, international, and industry standards in their regulatory documents, with a particular focus on standards for materials, equipment, systems and structures for the offshore petroleum industry (this effort was not specific to the Arctic)
