General Comment

Increased regulation and the resulting enforcement will create a financial burden both through increased energy costs and an increased tax/debt burden that the public should not be asked to bear. Current standards and self regulation by the companies which operate in the Gulf of Mexico remain satisfactory. Government regulation will ultimately hindered innovations which increase safety and productivity. As a private citizen and professional working in the oil and gas industry, I do not support Proposed Rule BOEM-2001-0003-0001.
