Re: Decommissioning of Leases OCS-P 0205 and OCS-P 0217

Dear Mr. Shellebarger:

This letter is to notify Chevron U.S.A. Inc. (Chevron) that Venoco, LLC (Venoco) has defaulted on its obligation to decommission leases OCS-P 0205 (LA Block 4661) and OCS-P 0217 (LA Block 4862) (collectively “the leases”). As such, the Bureau of Safety and Environmental Enforcement (BSEE) now looks to you as a prior lessee of the leases to perform the decommissioning and required maintenance and monitoring of the facilities on the leases prior to decommissioning.

As a prior lessee of the leases, you are responsible for decommissioning all wells, pipelines, platforms, and other facilities for which you have accrued decommissioning obligations under 30 C.F.R. § 250.1702. You are hereby notified to completely decommission all such wells, pipelines, platforms, and other facilities per BSEE’s regulations within one year of the date the leases were officially relinquished by Venoco. In this regard, Chevron may seek reasonable extensions of the one-year deadline as necessary and may use the existing pipelines on the leases, including any right-of-way pipelines, for the purpose of facilitating the decommissioning of the leases.

Chevron’s decommissioning obligations include the safe and orderly pre-decommissioning functions associated with all facilities and infrastructure for which you are responsible and the required inspection, maintenance, and monitoring of these facilities from the date of this order (hereinafter “this order”) until decommissioning is complete on the leases. Chevron, or its designated agent, will have the responsibility to comply with any applicable current or future regulatory requirements or obligations related to these facilities pending their ultimate decommissioning.

Accordingly, Chevron is hereby ordered to:
Mr. J.E. Shellebarger
