

Revised Permit to Modify (RPM)

Lease	P00301	Area	LB	Block	6488	Well Name	C014	ST	00	BP	00	Type	Development
Application Status	Approved			Operator	03126 Beta Operating Company, LLC								
Pay.gov	Agency			Pay.gov									
Amount:	Tracking ID:			Tracking ID:									
General Information													
API	043122011900			Approval Dt	03-JUL-2025			Approved By	Brian Little				
Submitted Dt	01-JUL-2025			Well Status	Completed			Water Depth	700				
Surface Lease	P00301			Area	LB			Block	6488				
Approval Comments													
Conditions of Approval													
1. All operations must be conducted in accordance with the OCS Lands Act (OCSLA), the lease terms and stipulations, the regulations of 30 CFR Part 250, Notices to Lessees and Operators (NTLs), the approved (revised) Application for Permit to Modify (APM/RPM), and any written instructions or orders of the District Manager or its designee.													
2. A copy of this permit (including all attachments) must be kept on location and made available to inspectors upon request during the permitted operation.													
3. All pressure-containing equipment must be tested to the approved permitted pressure and recorded on the daily operations report. If well pressures exceed the SITP/MASP stated in the approved permit, the equipment in use must be tested at a minimum to the new observed pressure. The District Manager or its designee must be immediately notified of this pressure change and, an RPM must be submitted to document the change.													
4. Notify the Permitting Section at least 72 hours in advance of beginning these approved operations AND of any required BOP tests AND of any plug testing or tagging. You MUST NOT proceed with these operations until an inspector can arrive to witness the testing OR the Permitting Section Chief or their designee waives the witnessing.													
5. WAR reports are due no later than noon each Wednesday.													
Correction Narrative													
Lowering the high pressure test on the CT preventor from 5000 to 2350 psi.													
The high-pressure test for all workovers using the Beta rig BOPs is 2350 psi which is in line with the field rules. SLB would prefer to pressure test to 2350 psi also in order to avoid undue wear and tear on the equipment													
Permit Primary Type Workover													
Permit Subtype(s)													

Revised Permit to Modify (RPM)

Operation Description													
Procedural Narrative													
The C-14 injector is used as a disposal well. It has recently started injecting at an increased injection pressure.													
Injection tests performed on 3 injection wells used for disposal found at least 1 well is completely plugged. A coil tubing clean out and 8,000 gals (SB4 volume is 146,615 gals) acid treatment will be performed on all 3 wells to ensure adequate disposal capacity is available for the upcoming drilling program.													
SB4 Volume Calculation: 71.8 gals per foot over 2,042' of reservoir sand at a porosity of 26% yields an SB4 volume of 146,615 gallons.													
Subsurface Safety Valve													
Type Installed SCSV													
Feet below Mudline 190													
Maximum Anticipated Surface Pressure (psi) 1400													
Shut-In Tubing Pressure (psi)													
Maximum Anticipated Wellhead Pressure (psi)													
Shut-In Wellhead Pressure (psi)

Questions													
Number		Question				Response		Response Text					
A		Is H2S present in the well? If yes, then comment on the inclusion of a Contingency Plan for this operation.				NO							

Revised Permit to Modify (RPM)

Lease P00301	Area LB	Block 6488	Well Name C014	ST 00	BP 00	Type Development
Application Status Approved		Operator 03126 Beta Operating Company, LLC				

Questions

Number	Question	Response	Response Text
B	Is this proposed operation the only lease holding activity for the subject lease? If yes, then comment.	NO	
C	Will all wells in the well bay and related production equipment be shut-in when moving on to or off of an offshore platform, or from well to well on the platform? If not, please explain.	N/A	
D	If sands are to be commingled for this completion, has approval been obtained?	N/A	
E	Will the completed interval be within 500 feet of a block line? If yes, then comment.	NO	
F	For permanent abandonment, will casings be cut 15 feet below the mudline? If no, then comment.	N/A	
G	Will you ensure well-control fluids, equipment, and operations be designed, utilized, maintained, and/or tested as necessary to control the well in foreseeable conditions and circumstances, including subfreezing conditions?	YES	
H	Will digital BOP testing be used for this operation? If "yes", state which version in the comment box?	NO	
I	Is this APM being submitted to remediate sustained casing pressure (SCP)? If "yes," please specify annulus in the comment box. If you have been given a departure/denial for SCP, include in the attachments.	NO	
J	Are you pulling tubulars and/or casing with a crane? If "YES" have documentation on how you will verify the load is free per API RP 2D. This documentation must be maintained by the lessee at the lessee's field office.	NO

Questions

Number	Question	Response	Response Text
K	Will the proposed operation be covered by an EPA Discharge Permit? (Please provide permit number comments for this question).	N/A	
L	Will you be using multiple size work string/ tubing/coil tubing/snubbing/wireline? If yes, attach a list of all sizes to be used including the size, weight, and grade.	NO	
M	For both surface and subsea operations, are you utilizing a dynamically positioned vessel and/or non-bottom supported vessel at any time during this operation?	NO

PAPERWORK REDUCTION ACT OF 1995 (PRA) STATEMENT: The PRA (44 U.S.C. 3501 et seq. Requires us to inform you that we collect this information to obtain knowledge of equipment and procedures to be used in drilling operations. MMS uses the information to evaluate and approve or disapprove the adequacy of the equipment and/or procedures to safely perform the proposed drilling operation. Responses are mandatory (43 U.S.C. 1334). Proprietary data are covered under 30 CFR 250.196. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. Public reporting burden for this form is estimated to average 11/4 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Mail Stop 4230, Minerals Management Service, 1849 C Street, N.W., Washington, DC 20240.
