General Information													
API	560452005600			Approval Dt	27-AUG-2025			Approved By	Junaid Ashfaq				
Submitted Dt	08-JUL-2025			Well Status	Completed			Water Depth	242				
Surface Lease	P00441			Area	SM			Block	6374				
Approval Comments													
Correction Narrative													
RPM being filed to include AC and departure.													
Permit Primary Type Abandonment Of Well Bore													
Permit Subtype(s)													
Temporary Abandonment													
<input type="checkbox"/> Proposed or <input type="checkbox"/> Completed Work													
Operation Description													
Procedural Narrative													
Please refer to attached procedures and WBS.													
Subsurface Safety Valve													
Type Installed N/A													
Feet below Mudline													
Maximum Anticipated Surface Pressure (psi) 1546													
Shut-In Tubing Pressure (psi) 0													
Maximum Anticipated Wellhead Pressure (psi)													
Shut-In Wellhead Pressure (psi)													
Rig Information													
Name		Id		Type		ABS Date		Coast Guard Date					
* HYDRAULIC WORKOVER UNIT		47935		Hydraulic Workove		31-DEC-2049		31-DEC-2049

Revised Permit to Modify (RPM)

Lease P00441	Area SM	Block 6374	Well Name A007	ST 00	BP 00	Type Development
Application Status Approved		Operator 03280 Freeport-McMoRan Oil & Gas LLC				

Questions

Number	Question	Response	Response Text
A	Is H2S present in the well? If yes, then comment on the inclusion of a Contingency Plan for this operation.	YES	Previously submitted.
B	Is this proposed operation the only lease holding activity for the subject lease? If yes, then comment.	N/A	
C	Will all wells in the well bay and related production equipment be shut-in when moving on to or off of an offshore platform, or from well to well on the platform? If not, please explain.	YES	
D	If sands are to be commingled for this completion, has approval been obtained?	N/A	
E	Will the completed interval be within 500 feet of a block line? If yes, then comment.	N/A	
F	For permanent abandonment, will casings be cut 15 feet below the mudline? If no, then comment.	N/A	
G	Will you ensure well-control fluids, equipment, and operations be designed, utilized, maintained, and/or tested as necessary to control the well in foreseeable conditions and circumstances, including subfreezing conditions?	YES	
H	Will digital BOP testing be used for this operation? If "yes", state which version in the comment box?	YES	OTC Greenlight Version 2.0
I	Is this APM being submitted to remediate sustained casing pressure (SCP)? If "yes," please specify annulus in the comment box. If you have been given a departure/denial for SCP, include in the attachments.	YES	SCP, 9-5/8 casing = 134 psi, 13-3/8" casing = 197 psi

Revised Permit to Modify (RPM)

Questions

Number	Question	Response	Response Text
J	Are you pulling tubulars and/or casing with a crane? If "YES" have documentation on how you will verify the load is free per API RP 2D. This documentation must be maintained by the lessee at the lessee's field office.	NO	
K	Will the proposed operation be covered by an EPA Discharge Permit? (Please provide permit number comments for this question).	N/A	
L	Will you be using multiple size work string/ tubing/coil tubing/snubbing/wireline? If yes, attach a list of all sizes to be used including the size, weight, and grade.	YES	Drillpipe - 3½", 13.3, S-135 Electric Line - 7/32", 0.092, GEIPS
M	For both surface and subsea operations, are you utilizing a dynamically positioned vessel and/or non-bottom supported vessel at any time during this operation?	N/A

Revised Permit to Modify (RPM)

Lease P00441 Area SM Block 6374 Well Name A007 ST 00 BP 00 Type Development
Application Status Approved Operator 03280 Freeport-McMoRan Oil & Gas LLC

Variances Requested for this Permit

Variance Status:	APPROVED
Variance Type:	Alternate Compliance
Variance Title:	TA opeations
Regulation Number:	30 CFR 250.1715(a)(4)
Oper. Justification:	FMOG requests an Alternate Compliance to 30 CFR 250.1715(a)(4)(ii) in setting the 20" inflatable bridge plug within less than 50' of the 13-3/8" stub end at 682' MD due to only milling a 20' window in the 13-3/8" casing to accommodate 10' of cement in the 20" casing.
Variance Date:	
BSEE Decision	approved
Remarks:	27-AUG-25

Variance Status:	APPROVED
Variance Type:	Departure
Variance Title:	TA operations
Regulation Number:	30 CFR 250.1715(a)(6)
Oper. Justification:	#1. FMOG requests a departure to 30 CFR 250.1715(a)(6) to section mill a window of sufficient length in the 13-3/8" casing to accommodate setting a mechanical barrier and spot less than 200' of cement in the 20" casing to isolate the 13-3/8" x 20" hole section. FMOG will mill a 20' window in the 13-3/8" casing and set 10' of cement on the mechanical barrier set in the 20" casing. . The departure is requested for the following justification: o Milling a window in the 13-3/8" casing is sufficient to accommodate a mechanical barrier and 200' of cement in the 20" casing is not necessary to accomplish the primary objective of: - Isolating the 13-3/8" x 20" hole section, by setting an inflatable bridge plug in the 20" casing, thus isolating the 13-3/8" casing and 20" casing. - The more exposure the section tool has to cuttings from the 13-3/8" casing could limit the success of pulling the section tool back to surface. - The 20" casing is the outer most casing in the well. The longer the milling tools scrape or hone the ID of the 20" casing with a longer length window, the greater the risk is of puncturing a hole in the 20" casing and thus exposing the well to open hole conditions. o At 65% cement bond strength, which is considered the pessimistic case for cement bond in an open hole situation, of the 15.6 ppg Class G Cement, the differential pressure of 10' of cement inside the 20", 94 ppf, X-52 casing is 3,426 psi. The MASP of the well is 1,546 psi, which is the worst-case exposure to the 20" casing in the event of reservoir repressuring or channeling pressure. 3,426 psi > 1,546 psi. Please see the attached document labeled, Cement Bond Strength Differential Analysis for 10' of 15.6 ppg Class G Cement in the 20" Casing. o As per procedure FMOG is performing the following procedure to

Revised Permit to Modify (RPM)

Lease P00441 Area SM Block 6374 Well Name A007 ST 00 BP 00 Type Development
Application Status Approved Operator 03280 Freeport-McMoRan Oil & Gas LLC

BSEE Decision Remarks:	ensure that the inflatable packer is holding pressure from below the inflatable packer prior to performing cementing operations. - Manufacturer pull test on the inflatable packer once the packer is set against the 20" casing ID. - Bubble test of the packer for 90 minutes. - Release from packer. - Bubble test of the packer for 90 minutes. - FMOG will subsequently bubble test the 20" casing from surface after the packer and cement are set. approved 27-AUG-25
Variance Status: Variance Type: Variance Title: Regulation Number: Oper. Justification: BSEE Decision: Remarks:	APPROVED Alternate Compliance TA operations 30 CFR 250.737(b)(1) FMOG requests an Alternate Compliance to 30 CFR 250.737(b)(1) and CFR 250.737(b)(2) to only test the inside of the choke and kill side outlet valves. approved 27-AUG-25
Variance Status: Variance Type: Variance Title: Regulation Number: Oper. Justification: BSEE Decision: Remarks:	APPROVED Alternate Compliance TA operations 30 CFR 250.737(b)(2) FMOG requests an Alternate Compliance to 30 CFR 250.737(b)(1) and CFR 250.737(b)(2) to only test the inside of the choke and kill side outlet valves. approved 27-AUG-25
Variance Status: Variance Type: Variance Title: Regulation Number: Oper. Justification: Variance Date:	APPROVED Alternate Compliance Digital BOP testing 30 CFR 250.737(c) FMOG requests an alternate compliance to 30 CFR 250.737(c) to use BOPE testing software, OTC Greenlight Version 2.0.21, in a predictive mode. approved
