Operation Description						
Procedural Narrative						
Beta requests to abandon the existing open hole interval. The drilling operation is unable to be finished due to mud losses in the open hole interval.						
Amplify energy commenced drilling operations on the C-55 ST1 well on Jan. 15, 2026. Drilling commenced following a 9-5/8" casing exit. The 8-1/2" x 9-7/8" hole was drilled to 4506' MD on Jan. 27, 2026 where severe losses were encountered. Several attempts were made to heal the losses with limited success, and the hole became compromised. After pulling out of the hole to switch BHAs it was observed that losses were in the B sand near +/- 3200' MD. A new BHA was run and was unable to pass that point. After receiving verbal approval on Feb. 1, 2026 for TA operations, the drilling operations were aborted on Feb. 2, 2026 and TA commenced. The TA was completed on Feb. 4, 2026.						
The well was left as a temporary abandonment with the intent to re-enter the well, date to be determined, and sidetracked to the same bottom hole location.
