Amount: \$125.00	Tracking ID: EWL-APM-203954	Tracking ID: 26GROPKE

General Information		
API 043112018201	Approval Dt 02-MAY-2019	Approved By John Kaiser
Submitted Dt 17-APR-2019	Well Status Approved St/Bp	Water Depth 190
Surface Lease P00241	Area LA	Block 6658

Approval Comments

Conditions of Approval:

- 1) All operations must be conducted in accordance with the OCS Lands Act (OCSLA), the lease terms and stipulations, the regulations of 30 CFR Part 250, Notices to Lessees and Operators (NTLs), the approved (revised) Application for Permit to Modify (APM/RPM), and any written instructions or orders of the District Manager.
- 2) A copy of this permit (including all attachments) must be kept on location and made available to inspectors upon request during the permitted operation.
- 3) All pressure containing equipment must be tested to the approved permitted pressure and recorded on the daily operations report. If well pressures exceed the SITP/MASP stated in the approved permit, the equipment in use must be tested at a minimum to the new observed pressure. The appropriate District must be immediately notified of this pressure change and a RPM submitted to document the change.
- 4) Notify the Permitting Section at Least 24 hours in advance of beginning these approved operations AND of any required BOP tests.
- 5) WAR reports are due no later than noon each Wednesday.

Correction Narrative

Permit Primary Type Other Operation
Permit Subtype(s)
Describe Operation(S)

Operation Description

Run production tubing and ESP, place well on production.

Procedural Narrative

B37 currently is in a temporary abandoned condition, and will be sidetracked to the D1P sand. It will be returned to injection with produced water. This work includes a BOP test, a scraper run to validate casing condition and hydrotest of new injection tubing. The seal bore will be run on tubing and spaced out at the liner packer. The tubing hanger will be landed and tested, and the tubing annulus filled with packer fluid and pressure tested. The BOP will be removed, and tree installed and tested. The proposed work is within the scope of prior activities in the field, and is considered routine.

Subsurface Safety Valve

Type Installed N/A

Feet below Mudline

Maximum Anticipated Surface Pressure (psi) 480

Shut-In Tubing Pressure (psi)

Questions			
Number	Question	Response	Response Text
1	Is H2S present in the well? If yes, then comment on the inclusion of a Contingency Plan for this operation.	NO	
2	Is this proposed operation the only lease holding activity for the subject lease? If yes, then comment.	NO	
3	Will all wells in the well bay and related production equipment be shut-in when moving on to or off of an offshore platform, or from well to well on the platform? If not, please explain.	NO	SOLID STEEL DECK BETWEEN DRILL DECK AND WELL BAY, PER FIELD RULES.
4	Are you downhole commingling two or more reservoirs?	N/A	
5	Will the completed interval be within 500 feet of a lease or unit boundary line? If yes, then comment.	NO	
6	For permanent abandonment, will casings be cut 15 feet below the mudline? If no, then comment.	N/A	
7	Will the proposed operation be covered by an EPA Discharge Permit? (Please provide permit number in comments for this question)	NO
