**16. STATEMENT TAKEN:**
On September 24, 2018 at approximately 0800 hours, a construction employee (CE) injured his left hand while attempting to cut a board with a hand saw.

A construction crew was in the process of building scaffolding below a float cell. The CE grabbed a 2” x 4” to use as a toe board for the scaffolding. The CE utilized a hand saw to make the cuts needed. As he began to cut, the saw bounced off the board coming in contact with the CE’s knuckle on his left hand. The CE was wearing leather gloves at the time of the incident. The construction operations were stopped as personnel administered first aid to the CE. The CE was transported to a medical facility for additional treatment.

The employee was referred to an orthopedic specialist where it was determined that tendons were damaged and would require surgery.

The BSEE Lafayette District conducted an onsite investigation October 1, 2018.

18. LIST THE PROBABLE CAUSE(S) OF ACCIDENT:

The CE failed to utilize a vise located on the facility to secure the board. Utilizing the vise could have prevented this incident from occurring.

19. LIST THE CONTRIBUTING CAUSE(S) OF ACCIDENT:

20. LIST THE ADDITIONAL INFORMATION:

21. PROPERTY DAMAGED: NATURE OF DAMAGE:

<table>
