EPA NPDES Noncompliances *****	320	273	288	300	346	257	211	165	251	129	99		Form 0131

* Drilling Rigs are large structures used to drill, workover, complete or decommission different types of wells; Non-Rig well activity involves well maintenance operations including coil tubing, snubbing, stripping, hydraulic workover, and intervention.

BSEE tracks the blocks where non-rig well activity was performed during each calendar year, but does not record information on the vessel from which the activity was performed.

** Any data listed as "Participants' Data" is a subset of the OCS data applicable to only those companies that submitted a BSEE 0131 form for that year.

*** The method used to count inspected components changed starting 2018; complex production equipment previously counted as one component started being counted as multiple components.

**** Oil Spill data in this table are the number and volume of reported oil spills from ongoing operations regulated by BSEE; it excludes data for drilling mud and other chemical spills.

***** The CY2010 total volume of oil spilled includes the estimated volume from the Deepwater Horizon Explosion, 4,928,100 bbbls. This estimate was provided from the Deepwater Horizon Incident Specific Preparedness Review (ISPR) report located here: <https://homeport.uscg.mil/Lists/Content/Attachments/1040/DWH%20ISPR%202011.pdf>. CY2010 was the first year of mandatory reporting for OCS operators.

***** Starting CY 2019, EPA NPDES Noncompliances were obtained from the EPA ECHO database and entered by BSEE into the BSEE 0131 form.

* Production figures represent a snapshot in time - they are current at the time data is extracted from the BSEE TIMS database. Prior year production figures may differ from previous versions of this publication as those data are periodically updated.

** Barrels of Oil Equivalent (BOE) production is the sum of oil and condensate production in Barrels (BBL) plus gas converted to BOE based on a factor that has changed as follows: 5.614MCF/BOE for 2013 and prior, 5.5998 for 2014/2015, 5.5470 for 2016/2017, 5.524 for 2018, 5.8 for 2019 forward

*** Any data listed as "Participants' Data" is a subset of the OCS data applicable to only those companies that submitted a BSEE 0131 form for that year.

**** The line above reflects all occupational fatalities that are reported to BSEE. Fatalities associated with diving, helicopter, and lifeboat incidents are investigated by other federal agencies and are not reflected in this line. We also exclude non-occupational fatalities reported to BSEE, such as from activities conducted during non-work shift hours or from a chronic pre-existing condition.

***** Beginning 2018 and finalized with a revised form in 2019, BSEE clarified that non-DART recordable injuries should be reported separately from DART recordables. In the past some operators interpreted the "Recordables" line on BSEE-0131 as a request for "Total Recordables" and some interpreted it as a request for "Non-DART Recordables" since there was already a separate line for DART data (the form never specified whether to enter Total or non-DART Recordables).

***** In 2020, operators reported 62 DART illnesses as a result of the COVID-19 pandemic via Form BSEE-0131. Without these, the total DART cases for 2020 would have been 78 DART injuries.
