

Hurricane Katrina/Hurricane Rita Evacuation and Production Shut-in Statistics Report as of Thursday, June 1, 2006

****This is the final report for Hurricanes Katrina and Rita****

For information concerning the storm click on www.mms.gov

This survey reflects 43 companies' reports as of 11:30 a.m. Central Standard Time.

Districts	Lake Jackson	Lake Charles	Lafayette	Houma	New Orleans	Total
Platforms Evacuated	1	22	18	2	28	71
Rigs Evacuated	0	0	0	0	0	0
Oil, BOPD Shut-in	0	20,462	23,668	31,808	151,950	227,888
Gas, MMCF/D Shut-In	12.90	304.01	263.612	160.85	357.88	1,099.25

These statistics reflect evacuations and shut-in production from Hurricanes Katrina and Rita (remaining)

NEW ORLEANS - In the last month there has been substantial improvement in the production numbers warranting another release so a decision was made to issue a final report after Hurricanes Katrina and Rita.

These evacuations are equivalent to 8.67% of 819 manned platforms and 0.00% of 134 rigs currently operating in the Gulf of Mexico (GOM).

Today's shut-in oil production is 227,888 BOPD. This shut-in oil production is equivalent to 15.19 % of the daily oil production in the GOM, which is currently approximately 1.5 million BOPD.

Today's shut-in gas production is 1,099 BCFPD. This shut-in gas production is equivalent to 10.99% of the daily gas production in the GOM, which is currently approximately 10 BCFPD.

The cumulative shut-in oil production for the period 8/26/05-6/1/06 is 162,425,332 bbls, which is equivalent to 29.67% of the yearly production of oil in the GOM (approximately 547.5 million barrels).

The cumulative shut-in gas production 8/26/05-6/1/06 is 784.502 BCF, which is equivalent to 21.493 % of the yearly production of gas in the GOM (approximately 3.65 TCF).

These cumulative numbers reflect updated production numbers from all previous reports. The reports only represent input received by 11:30 a.m. CST. If a company does not report by 11:30 a.m. it is not included in the special information release, but it is included in the cumulative shut-in production. This may result in an apparent increase in the cumulative report amount.

Shut-ins for oil and gas production are standard procedures conducted by industry for safety reasons. Once facilities have been inspected and all standard checks have been completed the production for these facilities will be brought back on line.
