On 6 June 2015 at 2151 hours, an injury occurred at MC 814 on the Maersk Developer under contract with Statoil Gulf of Mexico LLC. The operation at the time of the incident involved the drill crew, which included the Injured Person (IP), a Floorhand, who were attempting to free the insert carrier that was lodged against a 5" drill pipe tool joint inside of the casing wear bushing.

Preceding the incident, a drill pipe slip insert carrier was accidentally dropped into the well. While pulling the 5" section of drill pipe out of the well, the crew observed the master bushing being pushed upwards out of the rotary table. The crew then pulled the master bushings to investigate the problem. At this time, it was observed that the drill casing wear bushing was inadvertently pulled from the well head. After further inspection, it was confirmed that the casing wear bushing was being supported by the missing insert carrier which was lodged above a drill pipe tool joint.

With the diverter closed, the MPMA (Multi-Purpose Manipulating Arm) was positioned below the casing wear bushing to act as a protection device. The stand of 5" drill pipe was then raised clear of the drill floor to enable the crew to reinstall the master bushings back into the rotary table. With the master bushings back in place, the same 5" stand of drill pipe was lowered to rotary level. A wooden block was then placed on top of the rotary table with an additional wooden chock placed vertically on top of the wooden block. (This operation was being conducted in an attempt to free the jammed insert carrier from the casing wear bushing). After the first attempt, it was decided the wooden chock was too short. The stand of drill pipe was then raised approximately 2 feet to allow for a longer metal chock to be positioned inside of the casing wear bushing. The drill string was then lowered to engage the longer chock. When the chock came into contact with the insert carrier, the casing wear bushing unexpectedly dislodged from the insert carrier and fell approximately 1.0 to 1.5 feet onto the wooden block. At that same moment, the IP saw the chock move and positioned both hands on the lower end of the chock. Both of the IP's hands were caught between the casing wear bushing and the wooden block causing serious injuries to both hands. As a result, the IP's left hand was amputated just below the wrist. The IP also lost one full finger and two partial fingers on the right hand.

The BSEE investigation concluded that the probable causes of the incident were poor hand placement by the IP and the Rig Managers' failure to stop the operation and reassess the situation. Furthermore, another shortcoming was the failure of the team to recognize the hazards associated by a change in conditions after the first attempt to free the jammed insert carrier. Additionally, no written JSA (Job Safety Analysis) was in place. Only a verbal meeting "Toolbox Talk" was conducted in the Driller's shack prior to commencing this very dangerous operation.

18. LIST THE PROBABLE CAUSE(S) OF ACCIDENT:

Human Error: Poor hand placement.
Failure of everyone involved to recognize the numerous safety hazards.
Failure of key personnel for not stopping the job to reevaluate or assess the situation.

19. LIST THE CONTRIBUTING CAUSE(S) OF ACCIDENT:

No written JSA (Job Safety Analysis) in place. Only a verbal meeting in the Driller's shack prior to commencing this very dangerous operation.
20. LIST THE ADDITIONAL INFORMATION:

21. PROPERTY DAMAGED: None

   NATURE OF DAMAGE: None

ESTIMATED AMOUNT (TOTAL): $

22. RECOMMENDATIONS TO PREVENT RECURRANCE NARRATIVE:
   At this time the New Orleans District has no recommendations.

23. POSSIBLE OCS VIOLATIONS RELATED TO ACCIDENT: YES

24. SPECIFY VIOLATIONS DIRECTLY OR INDIRECTLY CONTRIBUTING. NARRATIVE:
   As of this date 6-23-2015, no Notification of Incident(s) of Non-Compliance have been issued.

25. DATE OF ONSITE INVESTIGATION:
   17-JUN-2015

26. ONSITE TEAM MEMBERS:
   Eary Roy /

29. ACCIDENT INVESTIGATION
   PANEL FORMED: NO

   OCS REPORT:

30. DISTRICT SUPERVISOR:
    David Trocquet

APPROVED DATE: 06-AUG-2015
