BSEE!Safe Text Message Service Tops 6,000 Subscribers

Receive BSEE Safety Alerts directly on your cell phone.

<https://bsee.gov/bseesafe>

For more information please contact us at:

bseepublicaffairs@bsee.gov

www.bsee.gov

The *BSEE!Safe* program, launched in May 2019, sends links to BSEE's published Safety Alerts via text message to subscribers so they can receive actionable safety information without unnecessary delay. As of May 7, 2020, more than 6,000 people have subscribed to the service, which supplements BSEE's long-standing practice of issuing Safety Alerts and Bulletins on its website, BSEE.gov and via email to operators.

BSEE is the first safety regulator in the world to deliver critical safety information directly to offshore workers through text messaging and has issued 35 Safety Alerts and Bulletins via 91,100 text messages since the launch of *BSEE!Safe* in May 2019. To view all of BSEE's Safety Alerts, please click <https://www.bsee.gov/guidance-and-regulations/guidance/safety-alerts-program>

The *BSEE!Safe* texts contain the title of the Safety Alert along with a link to the published Safety Alert. Subscribers can opt out at any time.

THEREFORE, BSEE Recommends:

- Offshore workers subscribe to the BSEE!Safe Text Messaging Service at <https://bsee.gov/bseesafe>
- Share the BSEE!Safe links, alerts with workers who have not yet subscribed to BSEE!Safe.

--BSEE--

A **Safety Alert** is a tool used by BSEE to inform the offshore oil and gas industry of the circumstances surrounding a potential safety issue. It also contains recommendations that could assist avoiding potential incidents on the Outer Continental Shelf.
