IN REPLY REFER TO:

CITATION

SAFETY AWARD FOR EXCELLENCE CAMARILLO DISTRICT PACIFIC OCS REGION

EXXON OFFSHORE STORAGE & TREATING VESSEL SANTA YNEZ

The Camarillo District Safety Award for Excellence (SAFE) is presented to Exxon for the period July 1 through December 31, 1991, for safe operating practices and professional adherence to the operating regulations while conducting operations on the Hondo Platform and Offshore Storage and Treatment Vessel in the Santa Ynez unit offshore southern California.

During the period of evaluation, the Santa Ynez unit facilities were inspected by the Minerals Management Service 47 times. The results of each inspection indicated that personnel operating the Santa Ynez unit facilities were very safety conscious and aware of the operating regulations. In addition, general housekeeping was outstanding and cooperation of Exxon personnel with the Minerals Management Service inspectors was excellent. Personnel training in operation of safety and pollution prevention equipment and devices, environmental awareness, first aid, water survival, and fire fighting demonstrated Exxon's commitment to maintain an extremely qualified work force and to safety and environment protection.

The purpose of the SAFE program is to recognize and encourage operational safety, environment protection and adherence to the applicable regulatory requirements. The Secretary of the Interior and the Director of the Minerals Management Service join me in congratulating Exxon and their employees for achieving the goals of the SAFE program.

J. LISLE REED
REGIONAL DIRECTOR
PACIFIC OCS REGION
