CITATION

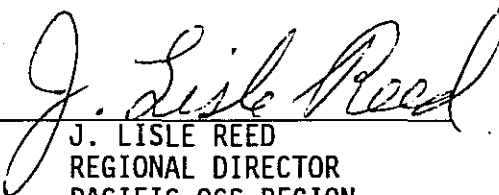

SAFETY AWARD FOR EXCELLENCE CAMARILLO DISTRICT

EXXON COMPANY U.S.A. PLATFORMS HARMONY AND HERITAGE SANTA YNEZ UNIT

The Camarillo District Safety Award for Excellence (SAFE) is presented to Exxon for the period July 1 through December 31, 1993, for safe operating practices and professional adherence to the operating regulations and other requirements pertaining to health, safety, and environment during the construction operations on Platforms Harmony and Heritage in the Santa Ynez Unit.

Exxon personnel at Platforms Harmony and Heritage have been found to be well-trained and performed their tasks in a professional and safe manner with a high degree of cooperation with Minerals Management Service (MMS) personnel. Inspections by the MMS at each facility during platform construction covered all applicable safety devices and activities. Results of these inspections revealed that a strong emphasis is placed on preventative maintenance, worker safety training, environmental protection, and good housekeeping practices. Santa Ynez Unit Team and other Exxon management and field personnel are acutely aware of the MMS regulations that apply to these operations and have fully cooperated with the MMS regional and district staffs; they have consistently shown willingness to meet or exceed all requirements pertaining to safety, health, and environmental protection.

The purpose of the SAFE program is to recognize and encourage operational safety, environmental protection and adherence to the operating regulations. I join the Secretary of the Interior and the Director of the Minerals Management Service in congratulating Exxon and their employees at Platforms Harmony and Heritage for achieving the goals of the SAFE program.

J. LISLE REED
