

Safety at All Levels, at All Times

BSEE Domestic and International Standards Workshop

November 14-15

James A. Watson, Director

Standards: Raising the Bar

- Standards development continues to be extremely important:
 - Enhanced safety requirements following *Deepwater Horizon*
 - Enhanced requirements following Hurricanes Katrina and Rita
 - New technologies for high temperature / high pressure

Keeping Pace with Technology

- Advancing technology easily outpaces regulations
 - Standards can be developed faster than new regulatory requirements
 - Standards help set the baseline
 - Standards should not be written to the lowest common denominator

BSEE Standards Involvement

- BSEE is active in standard setting bodies
- Domestic: Keep pace with technical advancement
- International: Contribute to high level of safety and environmental performance

Safety at All Levels, at All Times
