

Borehole Cleaning

Regulatory Perspective
May 8, 2015

“To promote safety, protect the environment and conserve resources offshore through vigorous regulatory oversight and enforcement.”

Regulatory Backing

- BSEE incorporates API Standards 65 –Part 2 for deepwater wells
 - Critical Mud Removal Parameters (29,30,31)
 - General Questions (1)
 - Critical Well Design Parameters – Centralization (7,7a,7b,7c)

Future

- As of this time, further regulation regarding borehole cleaning is not planned
