

New Carissa Report and Photos

The M/V New Carissa ran aground on a beach north of the Coos Bay Inlet in Oregon on February 4, 1999. An Incident Command System was established to coordinate the Federal Government's response to the incident and subsequent in-situ burning operations. NOAA's **Hazardous Materials Response Division** helped to manage information flow and documentation in support of **U.S. Coast Guard** operations. That information was distributed within the command posts in Oregon and via a **web site** (http://www.incidentnews.gov/incidents/incident_1.htm).

You can obtain a set of two CD-ROMs containing documents and digital photographs produced or obtained by NOAA as part of the response operations. These CD-ROMs contain all of the materials published on the New Carissa website through July 15, 1999, and are formatted for use on either Microsoft Windows or Macintosh computers:

- The **Information Management** CD-ROM contains documents such as the U.S. Coast Guard's Pollution Incident Reports, press releases, maps, and background information, all in PDF format, along with a copy of Adobe Acrobat Reader 3.01, a program you can use to view or print the documents.
- The **Photograph** CD-ROM contains digital images collected during the response; search by keywords or browse thumbnail images to find particular photographs; double-click thumbnails to view high-resolution images. All photographs are in JPEG format (some are also in KDC format). The CD-ROM contains a copy of each photograph at its original (highest available) resolution.

Cost of the two-CD-ROM set is \$20 (the CD-ROMs are not sold separately). Our preferred payment method is by any of the following credit cards: Visa, MasterCard, Discover, or American Express. **To place an order**, email us at **ORR.Library@noaa.gov**, or fax us at 206/526-4442. In your email or fax, please tell us

- your credit card account number and expiration date.
- your name, as it appears on your card.
- your daytime telephone and fax numbers.
- your Federal Express-accessible address.
